This Studio was designed to be impressive in every setting. This is a “Talents Studio” - designed for the station that wants LIVE ANNOUNCERS to have all the tools they need to make their show sound great. Many stations now have a “Morning Team”, so we’ve put a total of four microphones in this room. Since the talent may be playing music from CD’s, we’ve included three of them all remote started by pushing the button on the console! Of course you can play the music from the SpartaMation computer as well...which will be standing by in case an announcer is out or you want to automate overnights and weekends. In fact, with the powerful voice tracking capabilities of the SpartaMation, your automated times can sound just as live with time and temperature announcements in the local talents voice! The 360 Systems Instant Replay gives your talent sound effects, theme music or whatever audio at the touch of a button. There's plenty of room for guests in around the outside parameter of the new Graham-Studios Radio Curve Designer Furniture. Each guest has a headphone plug in. Most existing stations in the world would be envious of this "state of the art" studio. It all comes as a pre-wired kit that virtually anyone can install. Furniture custom sized or scaled to room size at no extra charge. Everything is pre-wired at EBS creating our famous "plug and play" studio system. No broadcast engineers are required to re-assemble this studio.
